ENVE 310 Basic Hydrology                                 Credit Hours:  4

Department:  Mathematics, Physics and Engineering
Required or Elective (circle one)

Current Catalog Description:

Basic Hydrology. (3-3) Study of hydrologic processes, including precipitation, interception, overland and soil storages, infiltration, percolation into groundwater, evapotranspiration, runoff, baseflow, flood routing, and flood and precipitation frequency analyses; understanding of measurements and observations of hydrologic parameters (e.g., precipitation and discharge); and application of GIS-based hydrologic models (e.g., HEC-GeoHMS and HEC-HMS). Credit for both HYDR 310 and ENVE 310 will not be awarded. Prerequisite: HYDR 110 or ENVE 210; HYDR/ENVE 211; MATH 311 or concurrent registration. Lab fee $15.

Course Schedule:
3 lecture hr/ wk, 3. lab hr/week

Coordinator:
Name: Dr. Xixi Wang, P.E.  email: xwang@tarleton.edu
office:  111 HYEG  phone: (254) 968 - 9164
office hours:

Pre/corequisites by Topic: (list course number, title, and specify if co-requisite)

- HYDR 110 – Introduction to Hydrology
- ENVE 210 – Survey of Environmental Engineering
- HYDR/ENVE 211 – Soil Mechanics
- MATH 311 – Probability and Statistics

Program Outcome and Course Learning Goals Map:
The Program Outcomes for Environmental Engineering are:

A. an ability to apply knowledge of math, engineering & science
B. an ability to design and conduct experiments, as well as to analyze and interpret data
C. an ability to design system, component or process to meet needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
D. an ability to function on multi-disciplinary teams
E. an ability to identify, formulate, and solve engineering problems
F. an understanding of professional and ethical responsibility
G. an ability to communicate effectively
H. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
I. a recognition of need for, and ability to engage in life-long learning
J. a knowledge of contemporary issues
K. an ability to use techniques, skills, and modern engineering tools necessary for engineering practice.
L. a depth and breadth of knowledge in engineering and physics necessary to work in a multidisciplinary environment

<table>

<tr>
<th>Course Goals</th>
<th>Program Outcome(s):</th>
</tr>
</thead>
<tbody>
<tr>
<td>Upon completion of this course with a C or better, students will</td>
<td></td>
</tr>
<tr>
<td>1. Gain the knowledge and ability to conduct preliminary researches and practical works related to hydrologic analysis and watershed simulation</td>
<td>A, B, E, G, I, K, L</td>
</tr>
<tr>
<td>2. Have a moderate understanding of hydrologic processes</td>
<td>A, B, E, G, I, K, L</td>
</tr>
</tbody>
</table>
3. Study the commonly used methods for estimating the major components of hydrologic processes A, B, E, K, L
4. Study the application limitations and conditions of these methods A, B, J, K
5. Study the hydrologic conversion between surface water and groundwater A, E, K
6. Learn the practical approaches for hydrologic frequency analysis A, B, J
7. Learn how to use PEAKFQ, HEC-GeoHMS, and HEC-HMS software packages in practice A, B, J, K, L

Contribution of Course to Meeting the Professional Requirement:
Math and Basic Sciences: 30%
Engineering Topics: 60%
General Education: 0%
Other: 10%

Other Information:

Class policies:
Exams:
Homework/Quizzes/Classwork:
Projects:

Absence policy:
Unexcused absences: Students who miss class without prior approval of their instructor will receive a grade of zero on missed in class assignments, quizzes, and/or exams.
University excused absences: Authorized absences must be approved by your instructor in advance of the absence, unless you have an emergency or illness, which still must be approved immediately upon your return. Make-up work must be completed outside of normal class hours within ONE WEEK following an excused absence. IT IS YOUR RESPONSIBILITY to see your instructor and make arrangements for make-up work.

Academic Honesty:
Cheating, plagiarism (submitting another person’s materials or ideas as one’s own), or doing work for another person who will receive academic credit are all-impermissible. This includes the use of unauthorized books, notebooks, or other sources in order to secure of give help during an examination, the unauthorized copying of examinations, assignments, reports, or term papers, or the presentation of unacknowledged material as if it were the student’s own work. Disciplinary action may be taken beyond the academic discipline administered by the faculty member who teaches the course in which the cheating took place.
Students with Disabilities Policy:

It is the policy of Tarleton State University to comply with the Americans with Disabilities Act (ADA) and other federal, state, and local laws relative to the provision of disability services. Students with disabilities attending Tarleton State University may contact the Office of Disability Services at (254) 968-9478 to request appropriate accommodation. Furthermore, formal accommodation requests cannot be made until the student has been officially admitted to Tarleton State University.
