The mission of the Department of Kinesiology is to provide quality educational opportunities related to movement and health, provide leadership experiences through service, and promote the total well being of students not only for a career but for a lifetime.

The Department of Kinesiology (KINE) offers programs in secondary and all level certification with specialization in Kinesiology and a curriculum for majors on a non certified basis. Courses are also offered in Kinesiology for specialization in elementary teacher certification. An athletic training program leading to state licensure is available through the Sports Medicine Program within the Department of KINE. Specific course requirements for becoming an athletic trainer may be obtained in the office of the Director of Sports Medicine. Kinesiology majors are required to exhibit departmental standards of health-related fitness. Kinesiology majors are also required to participate in leadership/professional development activities. Specific requirements may be obtained in the Department of Kinesiology.

The purpose Kinesiology activity courses is to develop skills and attitudes that will carry over into later life as well as develop physical fitness in the student. Repetition of any of these courses for credit must be approved by the Head of the Kinesiology Department.
