

Biology

520-3 Environmental Biology. (3-0) Study of humans' interactions with plants and animals within ecosystems to include environmental issues; conservation, utilization, and wise management of natural resources.

In course descriptions, the digit following the course number is the number of semester credit hours. For example, ENGL 111-3 is a freshman level course worth 3 semester hours of credit. The numbers in parentheses following the course number (for example, 3-2) indicate the number of clock hours per week devoted to theory and practice, respectively. (WI) indicates that sections of this course will be offered as writing intensive.
