

Horticulture

315-4 Weed Management. (3-2) General principles in the development of weed prevention and management programs. Common weed ecology and life cycles, land management factors, herbicide selection and performance, and cultural control strategies. Laboratory includes weed identification and herbicide application methods. Credit for both HORT 315 and AGRN 315 will not be awarded. Lab fee \$10. Prerequisite Course(s): HORT 200: Principles of Horticulture or HORT 270: Introduction to Turfgrass Science

In course descriptions, the digit following the course number is the number of semester credit hours. For example, ENGL 111-3 is a freshman level course worth 3 semester hours of credit. The numbers in parentheses following the course number (for example, 3-2) indicate the number of clock hours per week devoted to theory and practice, respectively. (WI) indicates that sections of this course will be offered as writing intensive.
