

# CS 230 - Lab 1

Due: 8/26/09

Points 10

## Purpose

The purpose of the lab is to learn how to:

- Use C to create a simple window
- Learn about how Window deals with messages

In this lab you will use Visual Studio to create a simple Windows application that displays text on the screen.

## Create the Project

Create a new Visual C++ Win32 App project. Use the defaults when creating the projects. Compile and execute the application.

Modify the project so that:

- It displays the words, "Hello World!", at (100,100) in the window
- It displays the words, "Left Mouse Up", wherever the left mouse button is released

Turn in a copy of your listing along with a snap shot of the screen.
