

# CS344 Lab 7 – Weather Data Analysis II

Assigned: 10/2/09

Points: 20

## Purpose

The purpose of the lab is to learn how to manipulate data using an array.

## Process

In this lab you will:

- Read in the weather data generated in Lab 5 and store it in 3 arrays
- You will then
  - Display only those data points where the velocity is negative
  - Compute and display the average velocity (**meters/sec**)

The display should be **neatly formatted**. **Do not assume that there is only 21 data points in the file.**

Turn in your work as you did for the previous labs.
