

# Technology

Click to access technology on our website

Residential Living & Learning is thrilled to partner with Apogee to provide you with residential network service. To guarantee that you're connected as soon as you move in, choose your plan by visiting the RL & L website and clicking on Technology in the main menu. Follow the steps to sign up and activate your account. System requirements for broadband service are available at [myresnet.apogeenet.net](http://myresnet.apogeenet.net) under the Quicklinks section.

Routers, access points, and other such network devices can cause connection problems and are therefore strictly prohibited on the network.

You will need to provide your own Ethernet cable for internet service and a Coaxial cable for Cable service.
