Procedure Statement

Tarleton State University is committed to the development and maintenance of health, safety, and environmental management programs. Safety is the business and responsibility of every campus citizen and can be better achieved through proper engineering, education, training, protective equipment, and enforcement of safety rules.

Reason for Procedure

It is the intent of the university to comply with all relevant local, state, and federal occupational and environmental regulations, codes, and standards.

Procedures and Responsibilities

1. Authority and Procedures

1.1 The president of Tarleton is responsible for developing, maintaining, funding and documenting health, safety, and environmental management programs and for overseeing their implementation and management. Risk Management and Safety is responsible for the administration of these programs. The objectives of the programs shall be to:

- (a) Provide a safe environment for students, employees, and the public;
- (b) Reduce the frequency and severity of incidents;
- (c) Comply with appropriate environmental laws;
- (d) Minimize the risk of accidental job-related deaths, occupational injuries and illness, state property losses, and environmental contamination by the use of recognized loss prevention and control techniques;
- (e) Establish written performance/accountability standards and objectives to reduce the incidence of death, injury, illness to persons, to conserve property and resources of the state, and to preserve the environment;
- (f) Provide adequate safety, health, environmental, and property preservation training and education for managers, supervisors, and employees;

- (g) Establish risk management/environmental health and safety committee(s);
- (h) Promote work practices that ensure the safety of persons and the preservation of state property and the environment;
- (i) Establish a procedure for conducting periodic risk management/environmental health and safety inspections so that potential hazards and risk are detected and corrected or controlled in a timely manner;
- (j) Comply with applicable state and federal laws, standards, rules, regulations and guidelines regarding safety and health, preservation, and environmental protections;
- (k) Provide for the designation of an individual(s), whose qualifications and experience are comparable to the guidelines set by the System Office of Risk Management and Safety, to serve as the organization's risk manager/environmental health and safety officer to assist in developing and implementing local rules and procedures;
- (l) Provide for the designation of an investigation and management of workers' compensation claims and the prompt return to work of injured employees; and
- (m) Promote investigation of incidents, injuries, and reported near misses to determine cause, effect, and means for prevention.

2. Training

The Environmental Health and Safety Department will provide training assistance to the university departments as necessary.

3. Reporting Requirements
