

## Animal Transfer Form

---

### ANIMAL TRANSFER FORM INSTRUCTIONS

The following Animal Transfer Form must be completed each time animals are transferred between projects. The form must be approved by the IACUC prior to animal transfer.

The Transfer Form approval process will include a review of both the transferring AUP and the receiving AUP. This is necessary to ensure that animal numbers are properly tracked on AUPs and that animals are not over utilized. Animals that have been subjected to a major survival surgery or other procedure with the potential for more than momentary or slight pain or distress will not be approved for transfer to another AUP with similar procedures without strong scientific justification and consideration by the entire Institutional Animal Care and Use Committee.

Please provide all information requested.

- In Section 5, if animals have been used, please specifically describe the previous use.
- In Section 6, if animals (e.g., dogs or horses) have been held on other AUPs prior to the transferring AUP, please list **ALL** prior AUP numbers. **If animals have been held on multiple AUPs, which include procedures which may result in overutilization, the Attending Veterinarian must endorse the transfer prior to approval.**

Submit the original document with original signatures to the IACUC with both principal investigators emailing their approval from their personal computer at work. The emails showing the email address of the principal investigators will serve as their signature.

### REQUEST FOR APPROVAL OF TRANSFER OF ANIMALS BETWEEN PROJECTS

1. Transfer From:

AUP #:

Title:

Principal Investigator:

Department:

Mail Stop:

Room Number:

2. Transfer To:

AUP #:

Title:

Principal Investigator:

Department:
