

COLLEGE OF AGRICULTURE and HUMAN SCIENCES

**Dr. Don Cawthon, Dean
Dr. Jane Dennis, Associate Dean**

**Agriculture Building, Room 101
(254) 968-9227**

The College of Agriculture and Human Sciences includes the Department of Agribusiness, Agronomy, Horticulture, and Range Management; the Department of Agricultural Services and Development; the Department of Animal Sciences; and the Department of Human Sciences.

Historically, Tarleton has been strong in the discipline of agriculture since its establishment in 1899, and it was known for most of the first half of this century as John Tarleton Agricultural College. Enrollment in Agriculture and Human Sciences exceeds 1,400. With 14 Texas universities offering baccalaureate degrees in agriculture, Tarleton's program is second in number of student majors in Texas and third nationally among non-land-grant universities. Tarleton's graduates have a reputation for high performance and for contributions to their professions in agriculture, agribusiness, education, and human sciences. Many have continued their education and attained graduate and professional degrees at leading universities nationwide.

The majors within the bachelor of science in Agriculture include strong programs in Animal Production, Animal Science, Animal Industries, Agribusiness, Agricultural Economics, Natural Resource Economics, Horticulture, Landscape and Golf Course Management, Agronomy and Range Management, Soil Science, Integrated Pest Management and Wildlife Management. The Department of Animal Sciences also offers a pre-veterinary medicine program.

The Agricultural Services and Development program, which includes the traditional teacher certification program (Agricultural Education), has received state and national recognition by routinely leading the state of Texas and the nation in numbers of graduates certified to teach. It remains first in the nation today. The department also includes options in Agricultural Communications, International Agriculture, Agricultural Extension/Industry, and Interdisciplinary Agriculture. Each program provides strong student internship opportunities.

The Tarleton Agriculture Center, supporting the instructional programs in agriculture, is located on 2,000 acres of University land and includes a dairy; beef cattle center, feedlot, and ranch; confinement swine operation; poultry facility; horse center with arena, stallion barn, and laboratory; horticulture center with greenhouses, frame house, and laboratory-classroom; golf course laboratory and support greenhouses; and a meats laboratory complete from abattoir to retail processing and sales. Located adjacent to the Texas A&M University Agricultural Research and Extension Center, the Tarleton Agriculture Center provides excellent employment experiences for Tarleton undergraduate agriculture majors and research opportunities for those seeking the master of science degree in agriculture.

The Department of Human Sciences provides courses in the areas of child and family studies, foods and nutrition, clothing and textiles, housing and design, and consumer economics and resource management. Tarleton presently offers a degree in Human Sciences with specialty options in teacher certification, child

and family studies, extension, fashion merchandising and, nutrition and foods. The department has approximately 200 majors, and provides course work for 1,000 students in other campus programs including education, physical health and training, nursing, and pre-allied health programs. The Department of Human Sciences maintains and manages a Child Development Center, which provides quality educational programs for children ages 3 to 5 years and laboratory experience for Tarleton students.

Tarleton emphasizes quality teaching in all of the agricultural and human science degree programs. Faculty include 32 full-time appointments, 25 with doctoral degrees from leading universities across the nation. Several Texas A&M University System faculty members serve as adjunct or graduate faculty.

ACADEMIC PROGRAMS IN AGRICULTURE AND HUMAN SCIENCES

Tarleton State University offers undergraduate and graduate programs in the Department of Agribusiness, Agronomy, Horticulture, and Range Management; the Department of Agricultural Services and Development, and the Department of Animal Sciences. Undergraduate programs are offered in the Department of Human Sciences. More detailed information is given regarding the departments, degree options, curricula, and course descriptions in following sections of the catalog. The departments are interdependent and utilize common resources in developing and offering specialized programs appealing to a broad array of student interests.

Department of Agribusiness, Agronomy, Horticulture, and Range Management

- I. Bachelor of Science – Agriculture
 - a. Agricultural Economics
 - b. Agribusiness Management
 - c. Natural Resource Economics
 - d. Agronomy and Range Management
 - e. Soil Science
 - f. Horticulture and Landscape Management
 - g. Integrated Pest Management
 - h. Golf Course Management
- II. Master of Science – Agriculture (thesis and non-thesis tracks)

Department of Agricultural Services and Development

- I. Bachelor of Science – Agricultural Services and Development
 - a. Agricultural Science with Teacher Certification
 - b. Agricultural Communications
 - c. Agricultural Extension and Industry
 - d. International Agricultural Services
- II. Bachelor of Science – Agriculture - Interdisciplinary Agriculture
- III. Master of Science – Agricultural Education (thesis and non-thesis tracks)

Department of Animal Sciences

- I. Bachelor of Science – Agriculture
 - a. Animal Science
 - b. Animal Production
 - c. Animal Industries
 - d. Wildlife Management
- II. Pre-veterinary Medicine Program
- III. Master of Science – Agriculture (thesis and non-thesis tracks)

Department of Human Sciences

- I. Bachelor of Science - Human Sciences
 - a. Teacher Certification
 - b. General/Extension
 - c. Fashion Merchandising
 - d. Child and Family Studies

Department of Agribusiness, Agronomy, Horticulture, and Range Management

Dr. Roger Wittie, Head

**Agriculture Building, Room 201
(254) 968-9221
e-mail: aahrm@tarleton.edu**

**Professors: Ewell, Rosiere, Wade, Wittie
Associate Professors: Kattes, Wang
Assistant Professors: Cummings, Weindorf, Yu
Instructors: Fox**

The Department of Agribusiness, Agronomy, Horticulture, and Range Management offers three Bachelor of science degrees. Through the faculty-student advisement process, a course of study is developed to allow the student to pursue his/her interest and potential while preparing for a long-term, productive career in production agriculture and/or agribusiness. Though not a requirement for all careers, a background that includes agricultural experiences either through employment or high school activities is valuable and may be supplemented through college work experiences, internships, cooperative education, and/or mentorships. All of the career tracks within the Department are strongly science/discipline-based with the goal of providing the graduate with the academic background necessary to compete in the current employment market and to be a long-term contributor to the profession.

The Department of Agribusiness, Agronomy, Horticulture, and Range Management Bachelor of science degrees include:

I. Agricultural Economics

The Agricultural Economics degree allows a choice from three support areas: agricultural economics, agribusiness management, or natural resource economics. The agricultural economics track includes courses designed to prepare students for a career in the analytical or research sectors of production, marketing, or finance. It also is the preferred track for students preparing for graduate study. The agribusiness management track shifts somewhat to courses that prepare students for entry-level positions in the retail/wholesale sectors of production agriculture or with firms supporting the agricultural industry. The natural resource economics track prepares students for careers in industry, government, or research. This track also offers solid preparation for graduate study.

II. Agronomy and Range Management

This degree includes support areas in agronomy, range management, and soil science. The degree is strongly science-based and allows the student to explore the world of resource management and conservation related to the production of food, fiber, and livestock. Students earning the degree may choose a career within the agricultural products and service industry, consulting, private or public lands management, environmental restoration, or pursue a graduate degree.

III. Horticulture and Landscape Management

This degree offers a choice from four support areas: science, business, golf course management, or integrated pest management. Each track allows students to select from courses necessary to build a strong, successful career. Horticultural business and golf course management are more appropriate tracks for those with interest in private sector employment, while the science and integrated pest management tracks are more appropriate for those interested in public service or graduate study. Employment opportunities include nursery/greenhouse management, landscape design and installation, landscape maintenance, park, sports field or golf course management, and many more.

THE BACHELOR OF SCIENCE DEGREE IN AGRICULTURAL ECONOMICS

	Semester Hours
<u>University Core Curriculum</u>	47
See pp. 47-48 for additional information about the Tarleton State University core curriculum requirements. See p. 272 for A EC course descriptions. Students who count ECO 201 as a social & behavioral science may substitute an agriculture elective. CHEM 103 and BIOL 120 are strongly recommended.	
<u>Courses Required for BS in Agricultural Economics</u>

Ag. Elective	3

THE BACHELOR OF SCIENCE DEGREE IN HORTICULTURE AND LANDSCAPE MANAGEMENT

	Semester Hours
<u>University Core Curriculum</u>	47
See pp. 47-48 for additional information about the Tarleton State University core curriculum requirements. See p. 363 for HORT course descriptions.	
<u>Courses Required for BS in Horticulture and Landscape Management</u>	
AGRI 101, 485; ENTO 201, 405, 406;	
BIOL 307, or 315	19
HORT 200, 210, 270, 300, 301, 310, 390, 420	24

Additional Required CoursesFor Support Area in Golf Course Management¹

SPAN 103, BIOL 320, 336	
MGMT 301 or 303, AGRN 420, ENTO 416	21
HORT 380, 470, 480, 495	15

For Support Area in Business¹

COBA electives	18
HORT 320, 401, 403, 430, 450, 484	21

For Support Area in Science¹

CHEM 108, 201	8
AGRN 309	4
BIOL 320, 336	8
HORT 484	6
Advanced BIOL, CHEM, AGRN, HORT, or ENTO	12-14

For Support Area in Integrated Pest Management¹

CHEM 108, 201	8
BIOL 320, 336	8
AGRN 309, 420	8
ENTO 416, 484	9
Electives	6

¹ Golf Course Management and Business support areas require CHEM 103 or 105. Science support area requires CHEM 105. All support areas require BIOL 120.

Department of Agricultural Services and Development

Dr. David Drueckhammer, Head

**Agriculture Building, Room 105
(254) 968-9200**

**Professor: Drueckhammer, Lovell
Associate Professors: Ford, Johnson, McGregor
Assistant Professors: Bellah, Priddy
Instructors: Partain**

The Department of Agricultural Services and Development was created with the flexibility to design career programs for students. Individuals seeking knowledge in education, communications, and various humanistic interactions within all segments of the agricultural industry will find interest in the department's offerings. Included are programs in agricultural science teacher certification, agricultural industry and extension, agricultural communications, international agriculture, and interdisciplinary agriculture. Internships are a part of all programs.

The Department of Agricultural Services and Development administers the Bachelor of science Degree with the following degree programs and support areas:

- I. Agricultural Services and Development
 - A. Agricultural Science with Teacher Certification
 - B. Agricultural Communications
 - C. Agricultural Extension/Industry
- II. Agricultural Services and Development–International Agricultural Services
- III. Interdisciplinary Agriculture

THE BACHELOR OF SCIENCE DEGREE IN AGRICULTURAL SERVICES AND DEVELOPMENT

	Semester Hours
<u>University Core Curriculum</u>	47
See pp. 47-48 for additional information about the Tarleton State University core curriculum requirements. See p. 277 for AGSD course descriptions; see p. 363 for HORT course descriptions.	

*All students planning to transfer into Agricultural Services and Development need to take one Biology course and CHEM 105 as the lab science requirements.

<u>Courses Required for BS in Agricultural Services and Development</u>	
AGRN 105, A EC 314, A EN 201, HORT 200	12
ANSC 107, WLDM 221	6
AGSD 101, 211, 302, 410, 450, 485, ENGL 309	19

From MGMT 302, 303, or MKTG 317	6

Department of Animal Sciences

Vacant

Agriculture Building, Room 116
(254) 968-9222

Professors: Cadle, Snyder
Associate Professors: Henneke, Harp
Assistant Professors: Breeden, Lambert, Mueller, Thomson
Instructors: Doty, Jackson

The Department of Animal Sciences offers a Bachelor of science degree in four different degree programs: Animal Science, Animal Production, Animal Industries, and Wildlife Management. In addition, the Department of Animal Sciences offers a Pre-Veterinary Medicine Program. The particular emphasis within each option provides appropriate training according to the career interests of individual students. All students complete a similar core curriculum, required by State and University regulations.

Historically, Tarleton has been known for its practical, hands-on approach to agricultural instruction. To allow for as much student exposure to real-life experiences as possible in an academic program, farm and ranch operations involving almost 2,000 acres of land and eight major teaching centers are utilized as agricultural laboratories. In addition to the animal facilities, several classrooms, indoor laboratories, two indoor-teaching pavilions, and an indoor equine arena are utilized in providing students with valuable "how-to-do" experiences.

I. Animal Science

This degree program provides a strong foundation in the scientific aspects (the "whys" and "hows") of animal production, nutrition, reproduction, anatomy, and physiology. Supporting course work in chemistry, biology, and math provides students with background necessary to an understanding of the complex physiological and biological phenomena that explain why and how animals function and perform.

II. Animal Production

This degree program stresses the practical "how-to" aspects of commercial livestock production with somewhat less emphasis on the "whys" and "hows" of animal physiology and biochemistry. Animal Production is especially designed for students who expect and desire a career in the commercial production, marketing and/or promotion phases of a livestock industry.

III. Animal Industries

The Animal Industries degree program offers students the combination of a strong foundation in animal science courses and basic business courses needed by graduates entering commercial and business enterprises related to animal agriculture.

IV. Wildlife Management

The objective of the wildlife management degree is to prepare students to work in the expanding field of wildlife management. The curriculum has the proper content of wildlife management, range management and biology to allow the student to become a certified wildlife biologist through Texas Parks and Wildlife and/or The Wildlife Society.

Pre-Veterinary Medicine Program

Students desiring to pursue a veterinary medicine career can complete, at Tarleton, all necessary prerequisites for application to the professional Doctor of Veterinary Medicine (DVM) program at Texas A&M University. Acceptance into the DVM program is quite competitive, and pre-vet students are encouraged to work closely with their academic advisor in planning their individual programs of study.

¹ Requirements subject to change pending decisions of TAMU College of Veterinary Medicine. If a fourth year of study leading to a baccalaureate degree is pursued prior to entry into veterinary college, additional Tarleton general education requirements must be completed.

² Recommended for gifted students with exceptionally strong high school background. Meets minimum recommendations for application to the professional veterinary medical program. All courses can also be applied towards a BS degree in Animal Science or other chosen related field; however, additional lower-level courses are required to meet Tarleton and/or State of Texas baccalaureate requirements.

For additional detailed information on application and other requirements, refer to the current issue of "Applicant Information," available from the College of Veterinary Medicine, Texas A&M University, College Station, TX 77843-4461; phone (800) 874-9591.

Department of Human Sciences

Dr. Jane B. Dennis, Head

**Wisdom Gymnasium Complex, Room 171
(254) 968-9196**

**Associate Professors: Dennis, Sale
Assistant Professors: Blaylock, Kim
Instructor: McKeehan**

The Department of Human Sciences (formerly Home Economics) offers programs of study leading to a Bachelor of science degree in Human Sciences. The support areas that may be chosen by the students for the BS in Human Sciences are General Human Sciences with Extension, Fashion Merchandising, Child and Family Studies, and Family and Consumer Sciences Secondary Teaching Certification.

H S 105, 202, 205, 210, 300, 301, 306, 309 or 316, 311, 312, 325, 333, 404, 407, 305 or 409, 433 ¹	51

EMPHASIS AREAS

A student pursuing a Bachelor of Business Administration degree in Interdisciplinary Business may elect Fashion Merchandising, or Housing and Interiors as the supporting field for his/her degree. These emphases combine Human Sciences and the various business disciplines. Information about these areas of study may be obtained from an advisor in either the Department of Human Sciences or the Department of Management, Marketing, and Administrative Systems.
