Core Curriculum
Course Proposal Cover Sheet

Department: Mathematics
College: College of Science & Technology
Department Head: Bryant Wyatt

Course Prefix & Number: Math 108
Course Title: Elementary Applied Mathematics
Course Description: Elementary mathematical applications to problems of finance, probability, statistics, and geometry, and the development of reasoning skills.

Please select the THECB Foundational Component Area for which this course is being submitted. (Please select only one)

FOUNDATIONAL COMPONENT AREA JUSTIFICATION FORM

Rationale: Please provide a rationale for the course which explains how the course being proposed fits into this component based on the component’s description. For your convenience, the overall description and rationale for this component are included below.

Mathematics (from THECB Chapter 4: 4.28)
- Courses in this category focus on quantitative literacy in logic, patterns, and relationships
- Courses involve the understanding of key mathematical concepts and the application of appropriate quantitative tools to everyday experience.

The following three Core Objectives must be addressed in each course approved to fulfill this category requirement: Critical Thinking Skills, Communication Skills, Empirical and Quantitative Skills.
- Critical Thinking Skills: to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information;
- Communication Skills: to include effective development, interpretation and expression of ideas through written, oral and visual communication;
- Empirical and Quantitative Skills: to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.

Rationale for Inclusion in this Category:
The Math 108 course is primarily a study of elementary mathematical applications. In this capacity, students use logic to analyze patterns and relationships in the areas of finance, probability, statistics, and geometry. The focus of the course is to teach students to analyze and solve problems using appropriate mathematical tools. Students justify their solutions in written form, using appropriate technology (i.e. graphs and tables on required graphing calculators) as needed to support their conclusions.
STUDENT LEARNING OUTCOME ALIGNMENT FORM
Mathematics

Course Prefix/Number: Math 108
Course Title: Elementary Applied Mathematics

Core Objective: Critical Thinking  CT1: Students will evaluate evidence in analysis, interpretation or arguments

Course Objectives: 1) Collect, analyze and represent data, using statistical measures, and a variety of visual displays. 2) Solve and interpret the solutions of probability and geometry problems, using technology as appropriate.

Learning Activities: Class lecture, cooperative learning activities, students working at the board, discovery-based activities. homework (including on-line homework)

Means of Assessment: Embedded test questions on the final exam

Core Objective: Critical Thinking  CT2: Students will be able to synthesize varied components of information to form a rational conclusion.

Course Objectives: 1) Select and interpret appropriate displays of statistical data. 2) Solve applications of compound interest, probability, and geometry.

Learning Activities: Class lecture, cooperative learning activities, students working at the board, discovery-based activities. homework (including on-line homework)

Means of Assessment: Embedded test questions on the final exam

Core Objective: Communication  C1: Students will express ideas in written, visual or oral forms to a range of diverse audiences in multiple settings.

Course Objectives: Write a clear, concise and logical justification of how the solution to a stated problem was derived.

Learning Activities: Class lecture, cooperative learning activities, students working at the board, discovery-based activities. homework (including on-line homework)

Means of Assessment: Embedded test questions on the final exam
Core Objective: Empirical and Quantitative  
EQS1: Students will gather, interpret or use numerical data/observable facts to arrive at an informed conclusion.

Course Objectives: 1) Collect, analyze and represent data, using statistical measures, and a variety of visual displays. 2) Solve applications of compound interest, probability, and geometry.

Learning Activities: Class lecture, cooperative learning activities, students working at the board, discovery-based activities. homework (including on-line homework)

Means of Assessment: Embedded test questions on the final exam

As department head, I will ensure that all faculty that teach this course are aware of the requirements that these core objectives and learning strategies be incorporated into the above referenced course. This action is taken so that Tarleton State University will be in compliance with Texas Higher Education Coordinating Board foundational component area and core objective requirements for the General Education Core Curriculum.

Signature

We, the undersigned faculty, support the proposed changes to this course and agree to incorporate them into our section of the above referenced course. This action is taken so that Tarleton State University will be in compliance with Texas Higher Education Coordinating Board foundational component area and core objective requirements for the General Education Core Curriculum.  
(Signed document should be kept in department office, listing names below on the electronic document implies acceptance)

The SLOs for Elementary Applied Mathematics were developed by mathematics faculty who primarily teach the course; the department then voted to approve these SLOs in 2009. All mathematics department faculty are in agreement that these SLOs represent the Elementary Applied Mathematics course.
