

# Employer -vs- Student Rated Proficiency: Career Readiness

Below are two sets of data compiled into one graphic. The first set is from the National Association of Colleges and Employers, Job Outlook 2018/2019 Student Survey assessing recent graduates on NACE Career Readiness Competencies.

"**Employers**" are supervisors who participated in the national survey regarding the career readiness of graduates entering the workforce.

"**Students**" data, from the same survey, depicts the graduates self-reported career readiness as they entered the workforce.

"**TSU Students**" data, which is the second set of data used for comparison purposes, was collected from 390 Tarleton State students who self ranked as "highly or very highly developed" on the Career Readiness assessment elements in Focus2Career from 2020-2022.
