

2019 Tarleton State University Invitational
Veterinary Science

Practicum #2

Filling a Syringe for Injection

Instructions: Please answer yes or no to the following questions. Select your choice by bubbling in the correct answer in the “**Assessment and Solution**” section of the Scan sheet.

Yes = **(A)**

No = **(B)**

DO NOT WRITE ON PRACTICUM.

11. Did the student determine the amount to be placed in the syringe?
12. Did the student apply the veterinary orders label to the syringe?
13. Did the student clean the top of the bottle with alcohol?
14. Did the student insert the needle through the rubber stopper?
15. Did the student securely hold the bottle in one hand and the syringe in the other hand?
16. Did the student hold the syringe at eye level?
17. Did the student pull the plunger down so that the top of the black stopper is aligned to the proper amount?
18. Did the student maintain the needle and syringe in the upright position prior to removing the needle from the bottle?
19. Did the student gently flick the syringe to move air bubbles to the top?
20. Did the student carefully remove the needle by twisting counter clockwise prior to putting the used needle in the sharps container?
