

## Wildlife Internship

Name of the Business: Rafter Land and Ranch Solutions

Located: Hico, Texas

Description: Manage properties for clients that have second homes away from the city. We manage all kinds of properties such as: wildlife game ranches, cattle ranches, vineyards, and recreational properties. We manage these properties in every sense of the word, from just keeping the yard nice and green, to building a vineyard from the ground up and maintaining it, filling feeders for white tail, doing surveys off game cameras, working cattle and calves when time calls for it, building and taking down fence, and any major project that the owners want to get done.

Skills, and requirements: Need to operate light and heavy machinery such as: Tractors, skid loaders, lawn mowers, chain saws, weed eaters, mules, and 4-wheelers. Also, common sense would be nice.

Intern Duties: Throughout the length of the internship, you are going to do one wildlife plan for one of the ranches that we manage. The wildlife plan will be made into a binder and will have to have a 10-year plan for the property, the proper way to manage it for those years, maps of the property, goals for the property, and how much a ranch can sustain certain animals and or plants. Now throughout the length of the internship we will give you time about once to twice a week to do this wildlife plan, but the rest of the time you are going to be thrown into rotation with other employees, to work on all these properties that we do.

Positions: Only one intern needed for this year.

Paid: Yes, Payment will be discussed through the interview process.

Schedule: This internship will only be offered throughout the summers. During the internship for the summer the hours would be from 6am-until the work is done for the day (full workday is 8-10 hours).
