Agenda Item 1: Minutes of the April 18, 2023 meeting.

Agenda Item 2: Consent items

Department	Program/Course	Change Request	Item No.	Effective Term
Criminal Justice (CJ)	CRIJ 5314 Criminal Justice Capstone	Course Change Title and catalog description changed to more accurately reflect desired course and program outcomes.	C565	202408
Med Lab, Pub Health, & Nutrition Science (MLPN)	MDLS 5092 Clinical Laboratory Practicum I	Course Change Updated catalog course description	C3654	202408

Agenda Item 3: Dept. of Animal Science

Department	Program/Course	Change Request	Item No.	Effective Term
Animal Science (ANSC)	ANSC 5310 Muscle Chemistry, Ultrastructure, and Physiology	New Course This course will provide both foundational and advanced information relevant for graduate students studying nutrition, reproduction, general physiology, meat science, and behavior. Currently, there is a gap between live animal nutrition and physiology and meat production. This course would serve to bridge that gap with an area of muscle biology and functional muscle chemistry.	C4836	202408

Animal Science (ANSC)	ANSC 5365 Minerals and Vitamins in Animal Nutrition	New Course This course will provide both foundational and advanced information relevant for graduate students studying nutrition, reproduction, general physiology, meat science, and behavior. Minerals and vitamins are usually only discussed as a brief subset of information covered in all of the nutrition and metabolism courses, but are rarely discussed to the degree that macro nutrients are.	C4835	202408

Agenda Item 4: Dept. of Wildlife and Natural Resources

Department	Program/Course	Change Request	Item No.	Effective Term
Wildlife & Natural Resources (WLNR)	ARSC 6310 Muscle Chemistry, Ultrastructure, and Physiology	New Course This course will provide both foundational and advanced information relevant for graduate students studying nutrition, reproduction, general physiology, meat science, and behavior. Currently, there is a gap between live animal nutrition and physiology and meat production. This course would serve to bridge that gap with an area of muscle biology and functional muscle chemistry.	C4838	202408
Wildlife & Natural Resources (WLNR)	ARSC 6365 Minerals and Vitamins in Animal Nutrition	New Course This course will provide both foundational and advanced information relevant for graduate students studying nutrition, reproduction, general physiology, meat science, and behavior. Minerals and vitamins are usually only discussed as a brief subset of information covered in all of the nutrition and metabolism courses, but are rarely discussed to the degree that macro nutrients are.	C4837	202408
Wildlife & Natural Resources (WLNR)	ARSC 6320 Advanced Production Economics	New Course This course will support the newly proposed ANRS-PHD.	C4944	202408
Wildlife & Natural Resources (WLNR)	ARSC 6312 Conservation Biology	New Course Required for the ANRS-PhD program. There are currently no doctoral level conservation biology courses.	C4939	202408
Wildlife & Natural Resources (WLNR)	ARSC 6321 Pollinator Ecology	New Course Required for the ANRS-PhD.	C4940	202408
Wildlife & Natural Resources (WLNR)	ARSC 6322 Carnivore Ecology	New Course Required for the ANRS-PhD.	C4941	202408
Wildlife & Natural Resources (WLNR)	ARSC 6327 Avian Ecology	New Course Required for the ANRS-PhD.	C4942	202408
Wildlife & Natural Resources (WLNR)	ARSC 6331 Wetland Ecology	New Course Required for the ANRS-PhD.	C4943	202408
Wildlife & Natural Resources (WLNR)	ARSC 6370 Advanced Applied Quantitative Methods	New Course Course is required to support the PhD in Animal and Natural Resource Sciences.	C4949	202408

Agenda Item 5: Dept. of Medical Science

Department	Program/Course	Change Request	Item No.	Effective Term
Medical Science (MEDS)	PAM-MMSc: Master of Medical Science in Physician Assistant Medicine	<p style="text-align: center;">New Program</p> <p>According to the U.S. Department of Labor/Employment and Training Administration (O-Net) the number of jobs for Physician Assistants in the state of Texas is expected to increase at a higher rate than the national average published by the US Bureau of Labor Statistics (BLS) for the period between 2020-2030. Projections suggest that the rate of job growth for Physician Assistants in Texas will be 41.35% during this ten-year period compared to 28% nationally. The Texas Health and Human Services Health Professions Resources Center reported that although the Physician Assistant workforce in Texas has improved, the state still has fewer Physician Assistants per capita than the national average. The same report revealed that Physician Assistants provide a significant amount of care in underserved rural areas that lack a sufficient number of physicians. With a relatively low number of Physician Assistants and a high level of demand for the services they provide, employers are offering impressive compensation packages. Analysis of primary care shortages in Texas indicates that as of July 2021, 249 of Texas' 254 counties have areas with shortages of primary care physicians. In 228 of these counties, the entire county has a shortage nearly double what it was as of 2019. Increasing the number of board certified, licensed Physician Assistants in the state is key to helping fill this void. Finally, according to the 2021 Statistical Profile of Certified Physician Assistants an Annual Report of the National Commission on Certification of Physician Assistants of the 10,000 Physician Assistants in Texas only 20% work in medically underserved communities and only 30% work in Primary Care. The report also indicated that 5% of the currently certified Physician Assistants in Texas plan to retire in the next 5 years. These findings confirm the growing need for Physician Assistants in the United States, specifically medically underserved rural regions of Texas. The TSU MMSc-PAM program has been designed specifically to meet the needs of rural communities in Texas and beyond.</p>	P357	202508
