MENTAL MEASUREMENTS YEARBOOK WITH TESTS IN PRINT (MMY with TIP)
MMY WITH TIP

A database devoted to mental health assessment tests.

Revised and updated – June 2020_LBW
ADVANTAGES TO SEARCHING FOR TESTS USING THE DATABASE MMY WITH TIP

Provides detailed description of tests including:

- reviews of psychological tests
- descriptions of psychological tests
- publisher, price, purpose, population, administration, and scoring for a test
- does not include journal articles, conference materials, or dissertations

USE DATABASE A-Z LIST TO LOCATE MMY WITH TIP
THREE WAYS TO SEARCH MMY WITH TIP

Use keywords pertaining to the subject of the test as shown to the right (ex: posttraumatic stress and adults)

Use the specific name of the test (ex: Detailed Assessment of Posttraumatic Stress)

Use the test acronym by first typing the field code ZC then the acronym in a search box (ex: ZC DAPS)
FINDING THE BEST TEST FOR YOUR USE

Peruse the results looking for keywords (circled in red) or subject terms that best fit your needs (circled in green) or test(s) that best fit your needs.

Detailed Assessment of Posttraumatic Stress

Review of the Detailed Assessment of Posttraumatic Stress by ROGER A. BOCOTHROYD, Associate Professor, Department of Mental Health Law and Policy, Louis de la Parte Florida Mental Health Institute, University of South Florida, Tampa, FL.

DESCRIPTION: The Detailed Assessment of Posttraumatic Stress (DAPS) is a 104-item self-report measure assessing exposure to trauma and posttraumatic response. The measure is intended for use with individuals who have undergone a significant psychological stressor. It can be used to assist clinicians in determining the presence or absence of a probable Posttraumatic Stress Disorder (PTSD) or Acute Stress Disorder (ASD) diagnosis. The DAPS can be group or individually administered and scored by individuals with no specialized training. It is appropriate for use with persons 18 years of age and older and requires that respondents have at least a sixth-grade reading level. The measure takes between 20 and 30 minutes to complete and can be scored and profiled in approximately 20 minutes. After reporting their exposure to various potentially traumatic life events, respondents report the severity of the most traumatic experience and the frequency of various symptom clusters using a 5-point scale with varying anchors ranging from a low of 1 to a high of 5.

The DAPS contains 13 scales. It has two validity scales designed to identify respondents who deny or underreport their symptoms (i.e., Positive Bias) as well as those who overreport their
CREATING REFERENCE ENTRIES FOR THE REVIEWS AND THE TEST

• You will need to create separate reference entries for each review used.

• For the test, Detailed Assessment of Posttraumatic Stress (DAPS), two reviews are available. Each review used must have a separate reference entry in your Reference page.
FROM THE DATABASE RECORD, IDENTIFY THE ELEMENTS NEEDED FOR THE REFERENCE ENTRY

Name of the test

Test’s publication date

Name(s) of the reviewers

Database source

Review’s publication date

Accession number
FORMAT OF REFERENCE ENTRIES FOR REVIEWS

Last name, first initial of first name of review author. (year the review was published). *Review of the Name of the Test [Database record]*. Mental Measurements Yearbooks with Tests in Print. Accession number. test.xxx
THE REFERENCE ENTRY FOR THE FIRST REVIEW OF DAPS LOOKS LIKE THIS:

Accession number: test.2497
FORMAT OF REFERENCE ENTRIES FOR THE TEST

Last name, First initial of author of the test. (year the test was published). *Title of Test Database Record (Acronym)* [Database record]. Mental Measurements Yearbook with Tests in Print.

Accession number. test.xxxx
REFERENCE ENTRIES FOR DAPS

References

APA’S PREFERRED CITATION SOURCES

• APA prefers that citation for tests originate from the supporting literature i.e., journal articles, manuals, or books rather than the test itself (APA Manual 7th ed., pp. 340-342)

• Use databases other than Mental Measurements Yearbook with Tests in Print to locate articles and books which reference the desired test.

• Test manuals may be used as a citation source. These may be found with the test or from the vendor’s website.

• Cite these articles, books, and manuals as per the Publication Manual of the American Psychological Association, 7th ed.
