# Color printing from Mobile Printing is a multi-step process.

1. Upload the Document (Same as with B/W) Default setting is Black and White.

2. Come to the library (if not already here), and log back into MyPrintCenter

4. Type color into the search box, and it will give choice of 3 printers…Select DQ-Lib-Main-Color

5. Make sure that your desired file is selected. You can then change the Color option under Printer options to Color. The print cost should update to reflect the higher cost.
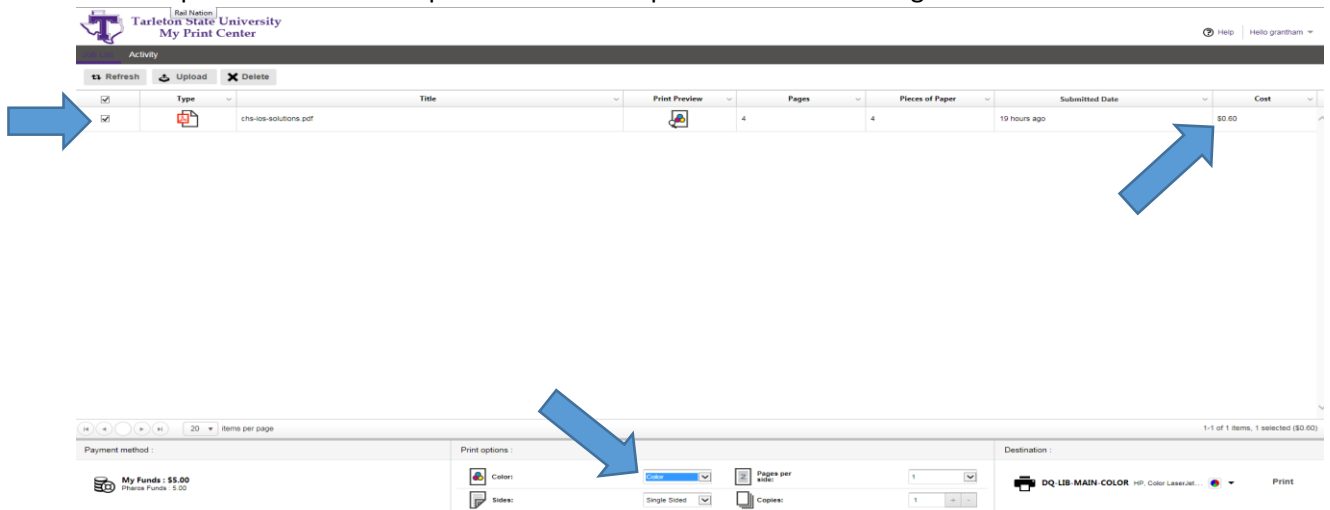

Color printing from Mobile Printing is a multi-step process.

6. Other print options can also be chosen as desired (single or double sided, multiple pages per side, & number of copies) for either B/W or color prints. (**Note**: Options chosen for B/W prints do not require a printer be selected. You can still simply release at the release station.

7. You will now be able to hit the print button. **Important: You need to be in the vicinity of the printer because this will get it to print more immediately.**
