Has the prospective student received approval from the prospective clinical site to participate in clinical rotations at their facility for the duration of the HT program?	YES
	NO

The hours that the student spends in their clinical rotation should be uncompensated and not include regular job duties unless directly related to their educational experience in the HT Program. The student should be supervised by laboratory staff at all times during their clinical rotation hours.

This form is not an affiliation agreement. If the student is accepted to the HT program, Tarleton State University will contact the clinical site to set up a formal affiliation agreement.
