

# SAP 29.01.03.T0.01 Information Resources – Acceptable Use

Approved: May 4, 2006  
Revised: February 28, 2012  
Revised: July 1, 2014  
Next Scheduled Review: July 1, 2019

---

## Procedure Statement

---

Under the provisions of the Information Resources Management Act, information resources are strategic assets of the State of Texas that must be managed as valuable state resources. Tarleton State University (Tarleton) has developed rules and procedures that address acceptable use of information resources.

---

## Reason for Procedure

---

This SAP provides a set of measures that will mitigate information security risks associated with acceptable use of university information resources. There may be other or additional measures that will provide appropriate mitigation of the risks. The assessment of potential risks and the application of appropriate mitigation measures will be determined by the information resource owner or their designee.

---

## Procedures and Responsibilities

---

1. **APPLICABILITY** - This SAP applies to all university information resources.
2. The information resource owner or designee (e.g. custodian, user) is responsible for ensuring that the risk mitigation measures described in this SAP are implemented. In accordance with Texas Administrative Code 202 - Information Security Standards, an information resource owner may elect not to implement some or all of the risk mitigation measures provided in this SAP based on information security risk management decisions and business functions. Such risk management decisions must be documented and reported to the designated ISO.
3. The rules and procedures for determining acceptable use of university information resources are addressed as follows:
