The following has been noted about my poetic work and its counterpart performance and is excerpted from, "Ego Killings; After All Those Living Rooms," A unique blend of spoken word with musical background. 21 shows in my 10 years at Tarleton with various professional and student musicians. I've performed from April 2001 to the present and will continue to write, produce, and perform these well received shows. The following has been noted about my poetic work and its counterpart performance and is excerpted from my press kit:

On my book After All Those Living Rooms, Ron Hansen, arguably one of the top five living American writers, wrote,

"As fierce, at times, as Allen Ginsberg, as bardic and confessional as John Berryman or Walt Whitman, Sam Dodson does his poetic father's proud, offering fifty-eight elegies and memories steeped in wisdom and dark emotional power. These are stunning, soul-searing poems, the product of an authentic, mature, and unafraid talent."

On my poetry performance with jazz, the following has been written,

"Dodson's combination of theatrical verve and assurance with evocative language and themes, both dynamic and delicate, mined the attention, imagination, and emotional memory of all present. . . .

The vitality of the writing is enhanced by the poet's unique collaboration with musicians whose gleaming of carefully chosen percussive punctuation and jazz riffs not only complements the poetry but seems to become a part of it. . . .

In the performance piece culled from the poetry in his new book After All Those Living Rooms, poet Samuel Dodson has created a finely-wrought work of art that achieves the dimensionality of classic theatre—universal themes, captivantly written and spoken with grace and candor."

Cathy M. W. Kurz, Artistic Director, Brigit Saint Brigit Theatre Company

"With many cultural events scheduled throughout our calendar, none quite reach the standard of those performed by Dr. Dodson. His literary quality and performance intensity prove outstanding. The poet paints colorful artwork with his words, and he sends his audiences on treks through his memories while rediscovering their own."

Janice Horak, Director, Dora Lee Langdon Cultural and Education Center

"Sam Dodson is a poet in the finest American tradition. His elliptical stories in verse spring from memories of childhood, of family, of transforming experiences. They repay many rereadings, but seem particularly well-suited to musical accompaniment. The urgent rhythms of jazz are the perfect complement to the poetry. Watching and listening to Sam's performances of his own poetry is both a pleasure and an illumination."

RESEARCH

Artistic and Professional Performances and Exhibits

Kegans, L. Q., This study compared ethnic classifications and occupational work ethic inventory (OWEI) characteristics of baccalaureate nursing students. The purpose of the study was to promote future research directed at increasing mutual acceptance and productivity in ethnically diverse healthcare workplaces. "Research shows that heterogeneous groups make better decisions than do homogenous ones. Diverse groups also tend to have better problem solving skills, are more creative, and deal more effectively with complex challenges" (Carver and Livers, 2002, p. 81). But, according to Marques (2007, p. 5) "diversity-oriented values, processes, or programs" in some organizations continually fail to encourage, nurture, and stimulate the best outcomes multiple worlds can bring to organizations and all the individuals involved.
