NIST Control Family – Access Control

| CONTROL NUMBER | CONTROL NAME | PRIORITY | REVISION DATE | NEXT SCHEDULED REVIEW DATE |
|----------------|-----------------------------|----------|---------------|----------------------------|
| AC-22 | Publicly Accessible Content | P3 | 4/15/2020 | 4/15/2021 |

I. Statement

Tarleton State University must ensure that publicly-accessible information systems do not contain nonpublic information. Additionally, the University must review the proposed content of publicly-accessible information and remove non-public information prior to posting onto the organization’s information systems. Individuals must be authorized to post content onto an organizational information system that is publicly accessible.

II. Applicability

The intended audience for this control includes, but is not limited to, all Tarleton information resource data/owners, management personnel, and system administrators.

III. Risk Statement

Laws and regulations are violated due to inappropriate disclosure of personal information.

IV. Implementation

Information Technology and the Marketing and Communications department will periodically review publicly accessible web material for nonpublic or inappropriate information.
